

Polymer Clay Workshop Supply List (Teapots Up-cycle)

By Marlene Gremillion

**Polymer Clay in a variety of colors plus white and black. I prefer Premo and Souffle by Sculpey (clay included in workshop fee)

**Roller I like the clear acrylic type, I will bring some for your use.

**Pasta Machine dedicated to Polymer Clay (sometimes you can find one at a garage sale or resale shop). I like a Makins Clay Machine or Atlas 150 or 180 (You may have to order the clay machine) I will bring some machines for your use also.

**Tissue Blade

Smooth surface to work on like a ceramic tile or tempered glass or a glass cutting board (NO wood though because polymer damages that surface) I have seen some people use the plastic cutting board sheets that come in a variety of colors but they will need to be taped down to your table. (I will bring extra for you to use)

Baby wipes

Paper towels or old hand towel

Rubbing Alcohol

Rubber stamps or something you might find around the house (old buttons, lace, mesh, coarse sandpaper, anything you can press into the clay and is flexible) I bring plenty but if you have a favorite you might bring.

Polymer clay canes you may have made variety of sizes, colors, and shapes but we will make a number of canes in class

Craft or hobby knife

Cookie cutters or small cutters, round, oval, square or variety, use what you have before purchasing. I will show you a variety you may use.

Two to three old teapots....I shop the flea markets, garage sales etc. for them. Cute shapes are the most fun to work with

Parchment paper for smoothing clay

Plastic wrap like saran can come in handy

Clear Plastic Sheet Protectors for a three-ring binder good for storing your conditioned clay

Note ** items can usually be picked up at Hobby Lobby or Michaels. You may be tempted to buy the cheaper brands of Polymer Clay, but I do not recommend them since they crack and break. All in the Polymer Clay Section. Most of the other materials can be purchased at Walmart, Dollar Store and any grocery or variety store.
